## MUSHROOMS ARE OUR PASSION

QUALITY  
CONTROLLED  
IN GERMANY  
★★★★★

The incoming goods inspection and the analysis of the ingredients of all medicinal mushroom raw materials take place in a German GMP Pharma and IFS-certified environment and thus exceed the European requirements for food and supplements.

The complete quality control process (internal and external) takes place in Germany. With our own and worldwide unique Mycotrition Fingerprint Analysis we guarantee specified ingredients like Polysaccharides, Adenosine or Cordycepine (depending on the respective raw material).

Furthermore, all batches are tested by the state-accredited laboratory group AGROLAB® according to the latest standards and are therefore allowed to carry the AGROLAB® quality seal. Each incoming raw material batch of each individual mushroom is tested for over 250 parameters, such as pesticides, heavy metals, radioactivity, PAH and microbiological contamination.

All our products (except for Enoki, special extracts: Reishi Triterpene <sup>max</sup>, Cordyceps-CPA<sup>3</sup>, Chaga dual extract) are available in conventional and organic quality.
